

SECURITY SERVICES, INC.

Effective supervision key element for successful organizations

## Effective supervision for increased productivity

Effective supervision is a key element for all successful organizations. Weiser Security’s supervision practices help us foster positive relationships with our officers. That’s why we employ stable, professional managers who create meaningful partnerships with officers in order to increase employee satisfaction and productivity. Each shift, each site is visited each week including weekends. Visits are frequent and meant to encourage communication and prevent officers in the field from feeling isolated.

Our Monthly Client Service Call Reports, done face to face, are created with the client and management staff. These meetings are used as a tool to develop action plans that help address any issues or concerns. Watch our Supervision Practices Video to learn more.
